Web Based MSDS Management Application

ATLANTA, GA.—IMTEK is proud to introduce its advanced Web Based MSDS Management Application. This application is powerful enough for global enterprises yet cost effective and simple to manage. This system is designed for companies that would like to purchase a Web Based MSDS Management Application to host and manage on their own internet or intranet site without any limitations. One of the key features that distinguishes our solution from our competitors is the ability to manage the system totally independently and bulk upload hundreds of documents in minutes from anywhere in a secure environment.

Simple One Time Only Low Price

When you purchase a license for this application it's the best investment in hazard communication compliance you will make because it's a one time cost. You won't ever have to worry about any future subscription fees, renewal fees or service fees because there is none. Furthermore, the license entitles you to use the system for an unlimited number of employees in your company or customers. It's that simple. It's that cost effective!

Web Based MSDS Management Convenience

This is a web based application that can be installed and managed on any server with Microsoft Windows 2000 Server, Microsoft SQL database and ASP. Since this application can be hosted on an internet or intranet server, it can always be available to employees or customers 24/7/365 globally with an Internet Explorer browser.

Hazcom Compliance Made Easy & Cost Effective

Our solution makes hazard communication management and compliance easy. This system will allow employees or customers to reliably access required MSDSs 24/7/365 and for you to archive obsolete MSDSs for 30+ years thus ensuring compliance with hazcom regulations. It will also enable you to eliminate paper MSDSs and improve your efficiency thus saving valuable time and money.

Practical Global Solution

The Web Based MSDS Management Application was designed to be a global system that can be used simultaneously by the entire enterprise or it's customers in various parts of the world. MSDSs in all formats can be loaded and searched by country so that only relevant versions of MSDSs are served to users in different countries.

Powerful Product and Document Bulk Upload

One of the unique features of this application is that products and documents can be added individually or in bulk. The ability to add hundreds of products using a few mouse clicks is a very powerful feature that saves a tremendous amount of time and is unparalleled in the industry. Products can be tracked by version number and archived when desired to keep the database streamlined.

Searching for MSDSs is Quick and Easy!

We have utilized state of the art search technology to make searching for your MSDSs quick and easy. Our advanced Search function is simple and searches all fields simultaneously so there are no complicated criteria to choose from.

When your search results are displayed, you have a wide range of options like viewing, printing, and saving the MSDSs. If you have admin rights, you can also edit and delete MSDSs at the click of a mouse!

Puts You in Total Control

Purchasing the license for this application gives you ownership and puts you in the driver's seat. You have total and exclusive control over your Web Based MSDS Management application. You can load it on an internet or intranet server of your choice and grant access to an unlimited number of your employees or customers. It's that simple!

Since you have control, your database will only contain MSDSs that are specific to your company. So you don't have to worry about slow searches because of millions of MSDSs that are in the system you don't even need or are obsolete. You also won't be inundated with a large amount of irrelevant and confusing search results because of unnecessary MSDSs in the system. By owning and managing your own system you will be ensuring that your system is streamlined and only contains relevant and current information.

Instant Comprehensive Report

A detailed report of all products in the system can be generated by the click of a mouse to summarize the following info: Product description, keywords, file name, file path, validation date, archive status, version, and posted date. The report is available as an Excel file that is versatile and easy to use.

Excellent Security

Our permissions based password protected technology ensures that only approved admins can load, edit and delete MSDSs which ensures the integrity of your MSDS management system.

Bundled Web Based MSDS Application and Safety Training CD Special Offer

For a limited time, we are offering a special buy one, get 10 free deal! When you purchase one Web Based MSDS Management Application, you get 10 Safety CDs with over 50 interactive safety and environmental courses absolutely free!
